

Global Health Diagnostics (International Format Sample)

Patient: J. Fernandes

ID: GH-40218

Age/Sex: 52 / Male

Date: 22-Feb-2026

BIOCHEMISTRY

Test	Result	Unit	Reference Range
Fasting Glucose	7.8	mmol/L	3.9 - 5.5
HbA1c	6.9	%	< 5.7

ANTHROPOMETRY

Height: 1.75 m Weight: 92 kg BMI: 30.0 kg/m²

EXPECTED BEHAVIOR: Fasting Glucose is in mmol/L, not mg/dL. 7.8 mmol/L converts to ~140 mg/dL (diagnostic range). Tests whether extraction correctly tags the unit as mmol/L (not silently assuming mg/dL) and whether Step 3 either converts correctly before classifying, or flags the unit mismatch instead of misclassifying a converted-but-mislabeled number.
